

# Rose Point ECS 2011: Where Did the Commands Go?

## Introduction

This document lists all of the commands from Rose Point ECS 2009 and describes where to find them (or their equivalents) in Rose Point ECS 2011.

## Menu Bar Commands

**File > New, File > Open, File > Save, and File > Save As:** these are all on the Main Menu.

**File > Page Setup, File > Print Preview, and File > Print:** these are all on the Main Menu under Print.

**File > Send To:** These are not available yet, but will appear on the Main Menu at some point.

**File > Export and File > Import:** these are on the Marks toolbar.

**File > Recently used files:** these are on the Main Menu under Recent

**File > Exit:** this is on the Main Menu.

**Edit > Undo and Edit > Redo:** These are on the Home and Marks toolbars.

**Edit > Cut, Edit > Copy, Edit > Paste, and Edit > Delete:** These are on appropriate context menus (right-click menus) and toolbars (and Ctrl+X, Ctrl+C, Ctrl+V, and Del).

**Edit > Select All:** Use Ctrl+A

**Edit > Find:** this is the Find Box on the tab bar (Ctrl+F will activate the Find Box).

**View > Quilting:** this is on the Chart Tools menu on each chart viewer.

**View > Scale:** these commands for selecting specific scales are no longer available.

**View > Orientation:** this is a button on the chart view controls as well as the U key.

**View > Task Pane:** the Task Pane can be turned on and off by clicking on the Task Pane tabs.

**View > Status Bar:** the status bar can no longer be disabled and is a permanent part of the tab bar.

**View > Chart Outlines:** this is on the Chart Tools menu on each chart viewer under Extra Layers

**View > Distance Scale:** this is on the Chart Tools menu on each chart viewer under Extra Layers

**View > Browser Panel:** the browsers are selected using the tab bar now.

**View > Full Screen:** this is on the Screen Control menu on the Home toolbar.

**View > Properties:** this is on appropriate context menus as well as the Properties Task Bar tab.

**Insert > object:** these commands are on the Home toolbar

**Insert > Navigation Object File:** use Import on the Marks browser toolbar.

**Format > Base Object Display, Format > Standard Object Display, Format > Full Object Display:** moved to the Chart Tools > Vector Charts menu.

**Format > Vector Charts:** moved to Chart Tools > Vector Charts > More Options.

**Format > Text Size:** this is on the Chart Tools menu on each chart viewer.

**Format > Chart Types** and **Format > Chart Colors:** moved to Chart Tools

**Format > Tide Levels** and **Format > Tidal Currents:** moved to Chart Tools > Extra Layers.

**Format > Raster Chart Note Links:** moved to Chart Tools > Raster Charts.

**Tools > Chart Portfolio:** moved to Main Menu > Charts.

**Tools > Download/Install Charts:** the download features are now part of the Sync button and the installation features have been moved to Main Menu > Charts > Install Charts.

**Tools > Navigation Object Browser:** use the Ship's Log browser for Events and Tracks, and use the Marks browser for other navigation object types.

**Tools > Weather:** use the Conditions browser.

**Tools > Activate Route** and **Tools > Deactivate Route:** use the route context menu, or the Voyage Plan browser toolbar.

**Tools > Enable Tracking** and **Tools > Start New Track:** right-click on the boat.

**Tools > Ship's Log** and **Tools > New Ship's Log Entry:** Use the Ship's Log browser.

**Tools > Planning Mode** and **Tools > Cruise Mode:** these are on the Screen Control menu on the Home toolbar.

**Tools > Configure Vessel and Electronics** and **Tools > Options:** moved to the main menu.

**Help > Contents and Index** and **Help > Keyboard Shortcuts:** moved to the main menu under Help > Documentation.

**Help > Welcome Window:** integrated into Main Menu > Help > Getting Started.

**Help > Coastal Explorer Network, Help > Send Feedback,** and **Help > Product Support:** moved to Main Menu > Help > Support.

**Help > License Activation:** moved to Main Menu > Help > License Registration.

**Help > Check for Updates:** part of the Sync feature now.

**Help > About:** moved to Main Menu > Help > About.

## Toolbar Commands

**Back** and **Forward**: These are on the tab bar.

**Find Box**: This was moved to the right side of the window.

**Chart Scale Controls**: These were moved to each chart viewer.

**Select, Zoom, and Pan Tools**: these are not currently available.

**One Chart View** and **Two Chart Views**: these are on the Screen Control menu on the Home toolbar.

**Undo** and **Redo**: these are on the Home and Marks toolbars (as well as Ctrl+X and Ctrl+Y).

**Highlight Objects**: this is on the Chart Tools menu on each chart viewer under Chart Colors.

**Add Route, Add Mark, Add Boundary Circle, Add Boundary Area, and Add RBL**: these are on the Home and Marks toolbars.

**Go To Boat**: this is a button on each chart viewer now.

**Browser Panel**: these are now the tabs across the top of the window.

NOTE: "Chart Tools" refers to the button on each chart panel that shows a wrench.
